

**AMENDMENTS TO THE SPECIFICATION**

Please amend the paragraph that begins on page 1, line 24, as follows:

FIG. 2 illustrates one example of such a conventional door seal structure, which is taken along the ~~line A-A~~ line 2-2 of FIG. 1. As shown, a glass run holding part 18 is provided inside an outer panel 20 of the door frame 12. The glass run holding part 18 has a generally U-shaped cross-section, and a glass run 22 is held in the glass run holding part 18. An outer seal lip 24 and an inner seal lip 26 of the glass run 22 contact a periphery of the door glass 16 on both surfaces thereof, thereby sealing the periphery of the door glass 16. An end edge of an inner panel 28 of the door frame 12 is welded to an inside wall 30 of the glass run holding part 18 to define a flange 32. The inner panel 28 includes a protrusion 34 that protrudes inwardly from the flange 32.

Please amend the paragraph that begins on page 9, line 12, as follows:

FIG. 2 is a cross-sectional view ~~of a conventional door seal structure, which is taken~~ along the line ~~A-A~~ 2-2 of FIG. 1 of a conventional door seal structure;

Please amend the paragraph that begins on page 9, line 14, as follows:

FIG. 3 is a cross-sectional view, which is taken along a cross sectional plane like that of FIG. 2, of another conventional door seal structure, ~~which is taken along the line A-A of FIG. 1;~~

Please amend the paragraph that begins on page 9, line 16, as follows:

FIG. 4 is a cross-sectional view, which is taken along a cross sectional plane like that of FIG. 2, of a first embodiment of a door seal structure, ~~which is taken along the line A-A of FIG. 1;~~

Please amend the paragraph that begins on page 9, line 18, as follows:

FIG. 5 is a cross-sectional view, which is taken along a cross sectional plane like that of FIG. 2, of a second embodiment of a door seal structure in accordance with the present invention, ~~which is taken along the line A-A of FIG. 1;~~

Please amend the paragraph that begins on page 9, line 21, as follows:

FIG. 6 is a cross-sectional view of a third embodiment, which is taken along a cross sectional plane like that of FIG. 2, of a door seal structure in accordance with the present invention, ~~which is taken along the line A-A of FIG. 1;~~ and

Please amend the paragraph that begins on page 9, line 24, as follows:

FIG. 7 is a cross-sectional view of a fourth embodiment, which is taken along a cross sectional plane like that of FIG. 2, of a door seal structure in accordance with the present invention, ~~which is taken along the line A-A of FIG. 1.~~
